

MICHAEL DONALDSON

FULL STACK SOFTWARE ENGINEER

Orlando, FL | (317) 775-7127 | blake18465@gmail.com | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineering student and full-stack developer with experience building React, Node.js, PostgreSQL, Python, and WebGL applications. Skilled in API-driven development, authentication flows, data modeling, performance optimization, accessibility, and secure user workflows. Combines hands-on software engineering experience with proven leadership managing high-volume operations, cross-functional execution, and measurable business outcomes.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML, CSS

Frontend: React, Hooks, State Management, Component Architecture, WebGL, Responsive UI

Backend / Databases: Node.js, REST API Design, Authentication Systems, PostgreSQL, Supabase, SQLite, H2

Tools / Concepts: Git, Docker, GitHub Actions, Chrome DevTools, CI/CD, Agile/Scrum, Data Modeling, Performance Optimization, Accessibility, HTTPS, ARIA, Section 508

SOFTWARE ENGINEERING EXPERIENCE

Full Stack Software Engineer Intern - Unscripted Inc

Remote | May 2024 - Sept 2024

- Contributed to full-stack application development using React, REST APIs, and modern frontend workflows.
- Optimized React rendering by reducing unnecessary re-renders, improving application load time by approximately 25%.
- Designed and supported REST API functionality to improve scalable data exchange between frontend and backend services.
- Used Chrome DevTools to identify performance bottlenecks, debug UI behavior, and improve responsiveness under load.
- Participated in Agile workflows, sprint planning, feature iteration, and collaborative code improvement.

TECHNICAL PROJECTS

Earth 3D Dashboard - Interactive Data Visualization System

JavaScript | WebGL | React | Data Visualization

- Built an interactive 3D globe dashboard for visualizing layered real-world datasets through a dynamic browser interface.
- Engineered modular data-layer architecture allowing dataset toggling without full application re-renders.
- Improved rendering performance by approximately 35% through draw-call reduction, batching, caching, and incremental loading.
- Added semantic labels and ARIA roles to improve accessibility for screen reader users.

PlantHaven - Full Stack E-Commerce Platform

React | Supabase | PostgreSQL | Stripe | REST APIs

- Developed a full-stack e-commerce platform with product browsing, authentication, checkout flow, and order data handling.
- Designed indexed PostgreSQL schema reducing query response times by approximately 30-40%.
- Implemented JWT-based authentication, protected routes, HTTPS-secured data transfer, and API-driven state synchronization.
- Reduced load times by approximately 25-35% using lazy loading, caching, and frontend performance optimization.

DRASTIC Planner - Decision Support System

Python | PySide6 | ETL | Desktop Application Development

- Built a Python desktop application for planning, risk analysis, and decision-support workflows.
- Designed a modular computation engine and lightweight ETL pipeline, improving processing efficiency by approximately 30%.
- Implemented asynchronous processing, validation checks, and test cases to improve accuracy and prevent UI blocking.

LEADERSHIP & OPERATIONS EXPERIENCE

General Merchandise Manager - Target

Orlando, FL | Dec 2025 - Present

- Lead an \$8M+ general merchandise business area across inventory, merchandising, fulfillment, and guest experience.
- Manage, coach, and support approximately 30 employees while aligning daily execution to business priorities.
- Improved inventory accuracy to 98%+ and reduced shrink by approximately 15% through stronger routines and accountability.
- Implemented process improvements later replicated across multiple store areas to improve consistency and execution.

Operations Coordinator - The Walt Disney Company

Orlando, FL | 2022 - Present

- Coordinated high-volume operations across departments while maintaining efficiency, execution standards, and guest service.
- Led and supported 50+ employees while managing competing priorities across teams and business needs.
- Improved inventory accuracy by 18% through workflow optimization, process follow-up, and operational consistency.

EDUCATION

Bachelor of Science in Software Engineering - Southern New Hampshire University | Expected 2027
